

## **DM SYSTEMS AND TEST GROUP ACQUISITION OF CALMET LABORATORY SERVICES**

**Kingston, April 12, 2022**, DM Systems and Test Group (D+M), specialist in calibration and engineering services, announces the acquisition of Calmet Laboratory Services (Calmet), a privately held calibration provider.

The acquisition of Calmet, established in 1990, consolidates and expands the extensive capability of the D+M calibration business, providing additional value and a greater range of services and support to its customer base throughout the UK.

Ken Ward, Managing Director of D+M, said, “We are delighted to welcome Calmet into the DM Group. Our aim is to continue our investment to enhance our operational capabilities, thus delivering value to our customers. This approach, we believe, will continue to support our position as a unique service provider in this market. This acquisition is an important step in our customer-centred growth plans ensuring that D+M capitalises on the numerous exciting opportunities to provide ‘best-of-class’ calibration services.”

Over the next few months, D+M will integrate this new company into its group with the goal of continuing to provide the highest level of service during this time. Our aim is to foster long and mutually beneficial relationships with all customers.

Calmet’s customers will benefit from D+M’s extensive and unique offering, including same day mobile calibration, United Kingdom Accreditation Service (UKAS) and National Traceable Calibration, Electromagnetic compatibility (EMC) and Safety Equipment supply. We will continue to ensure we deliver and tailor our service to meet our customers’ specific needs.

Andrew Lazarus, the previous director, and owner of Calmet, was careful to ensure he selected the right buyer for the business, which he has built over the past 3 decades.

### **ABOUT Calmet LABORATORY SERVICES**

Calmet provides a comprehensive calibration and repair service with a wide scope, offering UKAS, and National Traceable certification, both in the laboratory and onsite. The scope of calibration covers electrical, dimensional, torque, pressure and numerous other parameters.

### **ABOUT D+M**

D+M is a specialist calibration and engineering services provider to the UK and overseas commercial and defence markets. Services include calibration and repair of test and measurement equipment; design, manufacture and support services for subsea communications systems and navigation aids; and supply and support services for EMC, safety, and satellite communications equipment.

With the acquisition of Calmet Laboratory Services, D+M is enthusiastic about further developing its many relationships in the various markets and to supporting its existing and prospective customers.
